

## Patrol Power 2017-Up Ford F-250 Gas Engine Underhood Fuse Panel Mounting Location Part # PAN030417

Factory unthreaded bung on inner fender will be used in conjunction with thread forming screw included.

Lower mounting point utilizes factory coolant overflow mounting bolt.

Completed installation. Verify that all wiring has been securely tied away from any edges of fuse panel.

Patrol Power 2020-2022 Ford F-250 Gas Engine Underhood  
Circuit Breaker Mounting Location Part # PAN030417

Mount breaker as shown using M6 nut on factory firewall stud as shown. Note that this mounting location is available on the 2017 – 2019 model years as well

The photos to the left reflect the installation on a 2020 7.3L gas F-250

## Patrol Power 2017-2019 Ford F-250 Gas Engine Underhood Circuit Breaker Mounting Locations Part # PAN030417

The photos to the left reflect the installation on a 2017-2018 F-250

Factory thread forming screw will be used to mount circuit breaker to passenger side fender.

Note that due to the fact that this is such an old model year, the cables supplied will no longer facilitate the breaker being installed in this location, so the tech can either supply their own cables or mount the breaker in the same location as the 2020 – 2022 model years

Completed installation. For illustration purposes only. Please verify cables are protected with loom and held securely and safely with ties.
