

Patrol Power 2020-Up Ford Utility (Explorer) Gen I Underhood Fuse Panel Mounting Instructions Part # EX0011

Bracket mounts to driver side strut tower utilizing three factory locations.

1. Loosen 13mm head bolt on strut brace, slip bracket under bolt & tighten after installing hardware in steps 2 & 3.
2. M6 thread cutting screw (anti-seize will ease installation).
3. 1/4-20 cap screw and flange nut
4. Fuse panel mounting holes.

Mount fuse panel to mounting bracket utilizing (2) 1/4-20 x 3/4" cap screws, washers and nylon nuts. Screws align with round holes in mounting bracket. Note that screws are slightly longer than necessary to ease assembly.

Patrol Power 2020-Up Ford Utility (Explorer) Gen I Underhood Fuse Panel Mounting Instructions Part # EX0011

Fuse panel mounting completed & ready for harness routing. Harness & cables shown without loom for illustration purposes only. Loom, secure & protect all wiring.

Battery power connection is at installers discretion, but some vehicles feature a factory 200A fuse location that is a convenient connection point if desired.

WARNING: be aware that the windshield wiper motor and linkage are located under the same shrouded area as the battery and take all necessary precautions to protect harnesses & cables from moving parts (loom, cable ties, clamps, etc.).
